We all have it: sexual desire. But is libido a physical or psychological response? And what happens when it is directed at the same sex: Is male-to-male love ever legitimate, or for that matter, women who are in love with other women? Even in heterosexual relationships, how do people cope as a couple in marriage, or as single individuals. The Libido Lectures examines the issues and shares from the soul, heart... and other body parts. Over four weeks, men and women from diverse backgrounds will come together to share experiences and give passionate insights. Don't miss this opportunity as places are limited. Register today!
